Johnny Weston

AI Product Leader and Founder

San Francisco, CA and Miami, FL | jpw517@gmail.com | linkedin.com/in/johnnyweston

AI product leader and founder building collaborative agent software and computer vision products. Named co-inventor on three granted U.S. patents. Connect product strategy and UX with technical execution, enterprise partnerships, and the operating realities of bringing new technology to market.

CORE SKILLS

Product Product strategy, roadmaps, UX/UI, customer discovery, beta onboarding

Technical collaboration AI agents, computer vision, coding-agent workflows, repository reviews

Commercial Positioning, partnerships, go-to-market, demos, events, investor relations

EXPERIENCE

Nimlits formerly Lydo

Co-founder and Head of Product 2025 - Present

- Lead product strategy and UX for a shared workspace where people and AI coworkers collaborate; define how teams assign, inspect, and review agent work.
- Shape the roadmap across multi-agent collaboration, persistent workspaces, tools, shared memory, and reusable skills; translate beta feedback into product priorities.
- Work directly with engineering through repository reviews and coding-agent workflows, turning product requirements into implementation and resolving user experience issues.
- Drive positioning, partnerships, product demos, and onboarding for customer workflows.

WorldLayer

Founder and Product Lead, concurrent venture 2026 - Present

- Develop the product direction for a permissioned context layer connecting robots, AI agents, and businesses; the platform remains in development.
- Define workflows for scoped data access, permission revocation, and auditability with engineering, connecting technical architecture to enterprise requirements.

Tensormark

Co-founder and CEO 2020 - 2024

- Led product and commercial development of computer vision software for existing camera infrastructure, including safety and operational use cases.
- Built a strategic partnership with Vuzix around AI and smart glasses, including enterprise proof-of-concept evaluations.
- Supported a strategic initiative with University Hospitals to explore consent-based identity verification using computer vision and COVID-19 test results.
- Oversaw a school-district pilot spanning five schools, 178 cameras, and 242 video feeds.

Johnny Weston

EARLIER EXPERIENCE

Wheedle

Product and Marketing Leadership November 2014 - March 2019

- Led marketing, positioning, and strategic partnerships for an event technology platform spanning discovery, ticketing, and venue engagement.
- Helped develop and commercialize facial recognition entry and AI/augmented reality access experiences, connecting product development with venue operations and adoption.
- Co-invented patented event entry technology combining biometric identity, ticket validation, and access control.

TanZ Group

Co-founder Founded 2014

- Produced multi-city entertainment and music events, bringing together audience development, partnerships, and live event execution.

Prime Marketing and Management

President 2010 - 2015

- Led marketing and operating initiatives across 13 restaurants and bars, building experience in consumer positioning, venue operations, and customer acquisition.

Barley House

Director of Marketing 2009 - 2010

PATENTED INNOVATION

Named co-inventor as John P. Weston on three granted U.S. patents covering facial recognition, event entry, and identity authentication.

US10846963B2

US11640739B2

US11755706B2

EDUCATION

Baldwin Wallace University

Bachelor of Business Administration

COMMUNITY LEADERSHIP

H.E.L.P. Board Member | May 2017 - March 2021

Supported fundraising, events, and marketing for education and health projects in Malawi.
